

# Is Rutinib Cream a Good Option for Vitiligo Treatment

## What is Rutinib Cream?

Rutinib cream is a medication used to treat vitiligo in adults and children above 12 years. It is a Janus kinase inhibitor and is made by Drug International limited Bangladesh, which has a very high demand on the market for vitiligo treatment all over the world. Generic of Rutinib Cream is Ruxolitinib. Rutinib cream is also indicated for atopic dermatitis.

## How Does Rutinib Cream Work?

Rutinib Cream works by inhibiting Janus kinase inhibitor which helps the immune system to recover its lost pigmentation. Skin Pigmentation is made of melanin which is a kind of hormone lost by autoimmune attack and skin gets white in some parts of the skin. Sometimes it can spread throughout the whole body. Rutinib cream helps here to restore the lost pigmentation and recover skin. In most of the clinical trials and field examinations, it is found that rutinib cream works very well in vitiligo treatment.
